EDDIE MOTORSPORTS

TERMS & CONDITIONS

Dealer Requirements

Our policy is to consider a discount to any valid automotive aftermarket company including jobbers, repair shops, engine builders, and car builders. In an effort to support our dealers and protect the integrity of our distribution channels, we require that you provide us with verifiable proof that your company is actively and gainfully involved in the automotive aftermarket as part of your everyday business operation. Please supply ALL of the following information, via fax, mail or email, to avoid any complication in the approval process. Only companies with a published physical address will be considered for dealer status.

A completed, signed and dated Eddie Motorsports dealer application
(download at <http://www.eddiemotorsports.com/dealer>)

A copy of your company letterhead and business card

A copy of your current sales tax certificate (where applicable) or business license.

A completed and signed resale card (California only)

*We reserve the right to request further information before establishing a wholesale account

Payment Terms

Payment may be made by the following: Visa, Mastercard, Discover, American Express, or PayPal.

Refused Shipments

Shipments returned to Eddie Motorsports marked refused or not received in three attempts will cause the customer's buying status to be placed on hold until all shipping charges have been paid.

Shortages / Damages

Shortage or damage claims must be reported to Eddie Motorsports within 48 hours of receipt of shipments for any adjustments to be considered or reports to shipping companies to be made. Packaging materials must be kept, and photographs supplied so that we can contact the shipping company on your behalf.

Drop Shipments

Drop shipments for wholesale customers will be performed as needed. A \$15 drop fee will be charged.

Returns

All returns must be accompanied by a pre-authorized Return Number from Eddie Motorsports and must be returned to us with freight pre-paid. Returned parts may be subject to a 15% restocking charge. Freight is non-refundable. No returns will be accepted after 60 days from date of purchase.

No refunds or exchanges will be given for electrical parts or custom parts such as cut hose, custom colors, etc.

Freight

All orders will be shipped by standard ground Fed Ex or USPS Priority unless otherwise specified by the customer. All orders will be shipped F.O.B. Rancho Cucamonga, CA.

Prices

All prices are subject to change without written or verbal notice. If a product has a significant change in price we will do our best to notify our customers. Visit our website, www.eddiemotorsports.com for up to date prices.

Warranty

All products manufactured by Eddie Motorsports carry a one year limited warranty against defects in material and workmanship. Eddie Motorsports will repair or replace defective products as we deem necessary. Due to the wide variety of products we distribute, warranties may vary by manufacturer. Call for details on other manufacturer's warranties.

California Residents - Prop 65

Prop 65 requires businesses that manufacture and/or sell products in the State of California to inform consumers which items contain chemicals known to cause cancer and/or reproductive harm.

DISCOVER

Serpentine Pulley Drive Systems

EXCEPTIONAL QUALITY AT AFFORDABLE PRICES

One part number gives you everything you need to accessorize your engine with brilliant, high-strength American made billet aluminum brackets and new, name brand components. Available in v-belt, six and eight rib serpentine belt configurations.

Complete kits include:

- All new aluminum water pump
- Powermaster 170 amp Alternator
- GM Type II power steering pump
- Sanden Style AC compressor
- All necessary CNC machined billet aluminum brackets and pulleys
- Made in the USA
- Stainless steel fasteners
- Gates belts and spring loaded tensioner
- SFI Approved balancer (LS models only)

S-Drive™ Eddie Motorsports Serpentine pulley systems are the finest, most compact, and complete engine accessory kits on the market. Change the appearance & performance of your engine with a single 6 or 8 rib serpentine belt to drive all your accessories. Our drive system brackets and pulleys are CNC machined at our facility in Southern California from the highest quality 6061 T6 aluminum. Serpentine pulley systems include all the necessary stainless-steel fasteners and quality name-brand components. All S-Drive Serpentine kits include a Powermaster 170 amp alternator, Gates tensioner and 6 or 8 rib serpentine belt, Sanden style A/C compressor, and GM type II power steering pump. Our LS kits come complete with an SFI approved balancer. All kits are available in seven standard finishes and a variety of custom finishes.

S-Drive PLUS™ Eddie Motorsports S-Drive Plus 8 rib pulley systems have all the same features and benefits as our standard 6 rib belt systems with an additional 33% of surface area to minimize slippage when pushing your engine to the limits. Our S-Drive Plus kits will increase performance, improve durability, and reduce vibration and noise in high RPM applications.

Our V Drive V-belt Pulley Systems offer the same complete, compact design and simple installation as our popular Serpentine Drive systems but at a more affordable price. One part number gives you everything you need to accessorize your engine with American made billet aluminum brackets and pulleys, and new, name-brand components. These kits are equipped to work with electric or mechanical fans.

How to choose a serpentine pulley kit.

We believe Eddie Motorsports S-Drive Serpentine Pulley kits are the best, most complete kits available on the market today. We've put together a video to illustrate the finer points of our systems and to help you make a more informed buying decision. Visit our YouTube channel www.youtube.com/eddiemotorsports to see how to choose the correct serpentine system for your application.

Eddie Motorsports Offers the Widest Selection of Serpentine Belt Pulley Kit Finishes and Options

▲ Machined

▲ Clear Anodized

Highlight ▲

▲ Polished /Clear Coat

▲ Matte Black

▲ Gloss Black /Anodized

NOW AVAILABLE IN
Red, Blue, White, and
CERAKOTE™

Eddie Motorsports S-Drive Pulley Kits are the most compact and complete systems on the market. Billet aluminum brackets, pulleys, and spacers made in the USA ensure perfect fitment and alignment in ever kit.

▲ Attached Plastic Tank

▲ Attached Aluminum Tank

▲ Pump for Remote Tank

Eddie Motorsports S-Drive kits are available with three different power steering pump options

For any serpentine system to function efficiently it should incorporate a spring-loaded belt tensioner. All Eddie Motorsports S-Drive kits include a Gates spring-loaded belt tensioner to increase performance, improve durability, and reduce noise. Check out our YouTube page www.youtube.com/eddiemotorsports watch a video of a belt tensioner working to keep the belt tensioned correctly.

Small Block Chevy -Six Rib ⚠

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS107-55 with attached plastic P/S reservoir
- MS107-55B with attached billet aluminum P/S reservoir
- MS107-55R with P/S pump for remote reservoir
- MS107-56 without P/S pump

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS107-57 with attached plastic P/S reservoir
- MS107-57B with attached billet aluminum P/S reservoir
- MS107-57R with P/S pump for remote reservoir
- MS117-40 Water Pump Pulley for Mechanical Fan

Small Block Chevy Raven Series - Six Rib ⚠

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)

- MS118-55 with attached plastic P/S reservoir
- MS118-55B with attached billet aluminum P/S reservoir
- MS118-55R with P/S pump for remote reservoir
- MS118-56 without P/S pump

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS118-57 with attached plastic P/S reservoir
- MS118-57B with attached billet aluminum P/S reservoir
- MS118-57R with P/S pump
- MS117-40 Water Pump Pulley for Mechanical Fan

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

S-Drive PLUS™

- ▶ 33% greater contact patch ▶ Improved belt traction limits slippage ▶ Handles increased torque loads of 33%

Small Block Chevy -Eight Rib ⚠

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS107-10 with attached plastic P/S reservoir
- MS107-10B with attached billet aluminum P/S reservoir
- MS107-10R with P/S pump for remote reservoir
- MS107-11 without P/S pump

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS107-12 with attached plastic P/S reservoir
- MS107-12B with attached billet aluminum P/S reservoir
- MS107-12R with P/S pump for remote reservoir

Small Block Chevy Raven Series - Eight Rib ⚠

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)

- MS118-10 with attached plastic P/S reservoir
- MS118-10B with attached billet aluminum P/S reservoir
- MS118-10R with P/S pump for remote reservoir
- MS118-11 without P/S pump

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS118-12 with attached plastic P/S reservoir
- MS118-12B with attached billet aluminum P/S reservoir
- MS118-12R with P/S pump for remote reservoir

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

S-Drive™

Big Block Chevy -Six Rib ⚠️

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS107-50 with attached plastic P/S reservoir
- MS107-50B with attached billet aluminum P/S reservoir
- MS107-50R with P/S pump for remote reservoir
- MS107-51 without P/S pump

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS107-52 with attached plastic P/S reservoir
- MS107-52B with attached billet aluminum P/S reservoir
- MS107-52R with P/S pump for remote reservoir
- MS117-40 Water Pump Pulley for Mechanical Fan

Big Block Chevy Raven Series - Six Rib ⚠️

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)

- MS118-50 with attached plastic P/S reservoir
- MS118-50B with attached billet aluminum P/S reservoir
- MS118-50R with P/S pump for remote reservoir
- MS118-51 without P/S pump

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS118-52 with attached plastic P/S reservoir
- MS118-52B with attached billet aluminum P/S reservoir
- MS118-52R with P/S pump for remote reservoir
- MS117-40 Water Pump Pulley for Mechanical Fan

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

S-Drive™ PLUS

- ▶ 33% greater contact patch
- ▶ Improved belt traction limits slippage

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS118-82 with attached plastic P/S reservoir
- MS118-82B with attached billet aluminum P/S reservoir
- MS118-82R with P/S pump for remote reservoir

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

S-Drive PLUS™

▶ 33% greater contact patch ▶ Improved belt traction limits slippage ▶ Handles increased torque loads of 33%

LS Chevy -Eight Rib ⚠️

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS117-83 with attached plastic P/S reservoir
- MS117-83B with attached billet aluminum P/S reservoir
- MS117-83R with P/S pump for remote reservoir
- MS117-84 without P/S pump

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS117-85 with attached plastic P/S reservoir
- MS117-85B with attached billet aluminum P/S reservoir
- MS117-85R with P/S pump for remote reservoir

LS Chevy Raven Series - Eight Rib ⚠️

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)

- MS118-83 with attached plastic P/S reservoir
- MS118-83B with attached billet aluminum P/S reservoir
- MS118-83R with P/S pump for remote reservoir
- MS118-84 without P/S pump

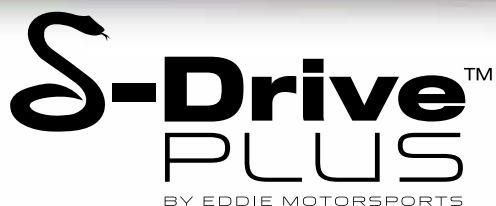

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS118-85 with attached plastic P/S reservoir
- MS118-85B with attached billet aluminum P/S reservoir
- MS118-85R with P/S pump for remote reservoir

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

LS systems WILL NOT work on engines with superchargers. For LS7 applications with dry sump, contact us for instructions.

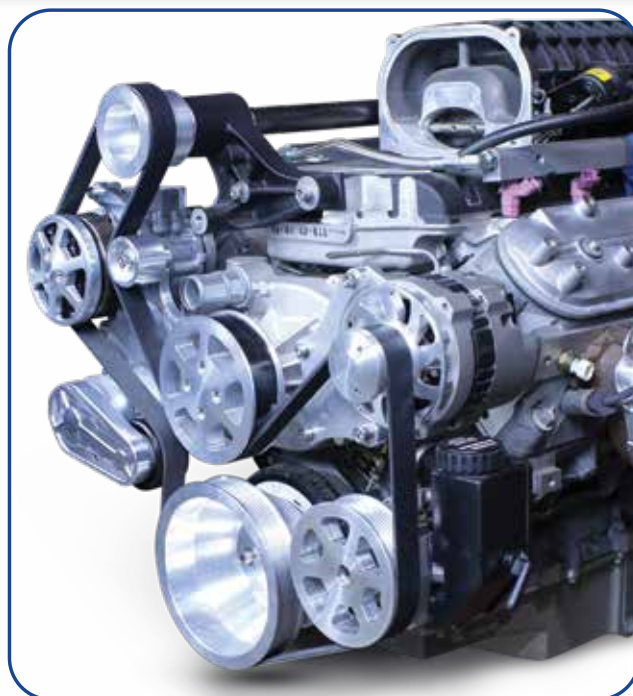

Eight Rib Serpentine Pulley Drive System LS Chevy with Magnuson Supercharger

S-Drive PULLEY SYSTEMS

Our high efficiency, high horsepower eight rib serpentine pulley system for LS Chevys using Magnuson's Universal Hot Rod Blower Kit (Our kit is designed to fit the: Magnuson TVS2300 with a 2010-2015 Camaro belt line). The pulley kits comes with everything you need to accessorize the front of your engine including a ATI performance SFI approved balancer.

LS Chevy with Magnuson Supercharger ⚠️

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS107-27 with attached plastic P/S reservoir
- MS107-27B with attached billet aluminum P/S reservoir
- MS107-27R with P/S pump for a remote reservoir

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Power Steering, includes A/C, 170 amp Alternator, and Aluminum Water pump *

- MS107-28M Machined
- MS107-28P Polished
- MS107-28XX Specify Color
- MS107-29R No A/C w/P/S pump for a remote reservoir

LS Chevy with Magnuson Supercharger Raven Series ⚠️

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)

- MS118-27 with attached plastic P/S reservoir
- MS118-27B with attached billet aluminum P/S reservoir
- MS118-27R with P/S pump for a remote reservoir

System without Power Steering, includes A/C, 170 amp Alternator, and Aluminum Water pump *

- MS118-28BA Black Anodized
- MS118-28BK Gloss Black
- MS118-28MB Matte Black
- MS118-29R No A/C w/P/S pump for a remote reservoir

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

LS systems WILL NOT work on engines with Variable Valve Timing (VVT) or superchargers. See pages 12 for VVT specific S-Drive kits! For LS7 with dry sump, contact us for instructions.

Serpentine Pulley Drive Systems LS Chevy Pro Touring

S-Drive™
PLUS
BY EDDIE MOTORSPORTS

Eddie Motorsports Pro Touring S-Drive 8 rib pulley kits have all the same features and benefits of our standard kit with an oversize power steering pulley and secondary idler pulley for increased wrap and improved performance in high RPM Autocross style driving. Pro Touring LS Kits come complete with all necessary precision CNC machined billet aluminum brackets & pulleys, which are made in the USA, as well as high quality, name brand components; PRW aluminum water pump, Sanden-style compact A/C compressor, GM type II power steering pump for a remote reservoir (resevoir sold separately), Powermaster 170A alternator, SFI approved ATI performance balancer. Available in seven custom finishes. Kits with polished and clear finishes include polished components, kits with colored finishes include natural cast finish components. Raven series pulley kits come with all black components.

LS Chevy Pro Touring ⚠️

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering pump for a remote resevoir.

MS117-95 with P/S pump for remote resevoir

LS Chevy Pro Touring Raven Series ⚠️

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering pump for a remote resevoir.

MS118-94 with P/S pump for remote resevoir

Available Finishes:

*Specify color when ordering: **P**=Bright Polished
M=Raw Machined **BA**=Gloss Black Anodized
BK=Gloss Black **CA**=Clear Anodized **CL**=Protective Clear Coat
MB=Matte Black **R**=Bright Red **B**=Bright Blue
W=Gloss White **CK**=Cerakote **HL**=Highlight

LS systems WILL NOT work on engines with superchargers. For LS7 applications with dry sump, contact us for instructions.

Serpentine Pulley Drive Systems LSA/LS9 Chevy

Eddie Motorsports' S-Drive 8 rib serpentine pulley kits include everything to accessorize your LSA or LS9. Designed with a single serpentine belt our LSA Chevy Kits come complete with all necessary precision CNC machined billet aluminum brackets & pulleys, which are made in the USA, as well as high quality, name-brand components; PRW aluminum water pump, Sanden-style compact AC compressor, GM type II power steering pump with attached plastic reservoir, Powermaster 170A alternator, SFI approved ATI Racing balancer. Available in seven custom finishes. Kits with polished and clear finishes include polished components, kits with colored finishes include natural cast finish components. Raven series pulley kits come with all black components. Specify steering type in the order notes when placing your order (power steering gearbox or rack and pinion).

LS Chevy LSA/LS9 ⚠️

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)
MS117-96 with attached plastic P/S reservoir

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

LS Chevy LSA Raven Series ⚠️

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)
MS118-96 with attached plastic P/S reservoir

*Specify finish (Gloss or Matte Black) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

LS systems WILL NOT work on engines with Variable Valve Timing (VVT) or superchargers. See page 12 for VVT specific S-Drive kits! For LS7 with dry sump, contact us for instructions.

Serpentine Pulley Drive Systems Big Block Mopar

S-Drive™

Our Mopar kits come with everything necessary to accessorize the front of your engine including an aluminum water pump housing and a Mopar OEM look, 165A amp, one wire alternator with internal cooling fan. Our Mopar S-Drives are the cleanest looking systems on the market as we utilize a single spring loaded tensioner to keep the serpentine belt properly tensioned at all times; no need for multiple idler pulleys to clutter up the assembly. **The Mopar S-Drive must be used in conjunction with a thin crank vibration damper with dimensions of Mopar Performance number P3830183 or equivalent (distance from the face of the timing cover mounting surface on the block to the pulley mount surface on the face of the damper measures 2.144". Spacers are available to accommodate shorter dampers).**

Big Block Mopar 383-426 Hemi-440 S-Drive Serpentine Systems ⚠

Complete System with A/C, 165A amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS107-67 with attached plastic P/S reservoir
- MS107-67B with attached billet aluminum P/S reservoir
- MS107-67R with P/S pump for remote reservoir
- MS107-68 without P/S pump

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Air Conditioning, includes 165A amp Alternator, Aluminum Water pump, and Power Steering *

- MS107-69 with attached plastic P/S reservoir
- MS107-69B with attached billet aluminum P/S reservoir
- MS107-69R with P/S pump for remote reservoir

- MS117-52 Water Pump Pulley for Mechanical Fan

Big Block Mopar 383-426 Hemi-440 S-Drive Serpentine Systems Raven Series ⚠

S-Drive™

Serpentine Pulley Drive Systems Small Block Ford

Small Block Ford Serpentine Pulley Kits come with everything you need to accessorize the front of your engine including a billet aluminum timing cover for easy installation. The cover does NOT have a provision for a fuel pump (the cover requires use of an electric pump). Kits are designed for use with factory four bolt pattern balancers with a maximum diameter of 6.40" and a measurement from the face (pulley mounting surface) to the block surface of 4.70". Aftermarket dampers can be purchased for engines requiring a 28 oz externally balanced model. Front sump oil pan applications require a new dipstick and tube assembly (sold separately).

Small Block Ford 289-351W ⚠️

Complete System with A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering * (See page 6-7 for more details.)

- MS107-63 with attached plastic P/S reservoir
- MS107-63B with attached billet aluminum P/S reservoir
- MS107-63R with P/S pump for remote reservoir
- MS107-73 Dipstick and Tube assembly for front sump oil pans
- MS107-64 without P/S pump

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

- MS107-65 with attached plastic P/S reservoir
- MS107-65B with attached billet aluminum P/S reservoir
- MS107-65R with P/S pump for remote reservoir
- MS117-50 Water Pump Pulley for Mechanical Fan

Small Block Ford 289-351W Raven Series ⚠️

Complete System with All Black components; A/C, 170 amp Alternator, Aluminum Water pump, and Power Steering* (See page 6-7 for more details.)

- MS118-63 with attached plastic P/S reservoir
- MS118-63B with attached billet aluminum P/S reservoir
- MS118-63R with P/S pump for remote reservoir
- MS107-73 Dipstick and Tube assembly for front sump oil pans
- MS118-64 without P/S pump

System without Air Conditioning, includes 170 amp Alternator, Aluminum Water pump, and Power Steering *

S-Drive™

Serpentine Pulley Drive Systems Cleveland Ford

Ford Cleveland kits utilize two six rib serpentine belts and are designed for use with factory four bolt pattern balancers. Our drive system's brackets and pulleys are CNC-machined from high quality billet aluminum. The pulley system also includes the necessary stainless steel fasteners as well as the highest quality name-brand components including a Powermaster 170 amp alternator, Gates tensioner, serpentine belts, Sanden style A/C compressor, and GM Type II power steering pump with three optional reservoir configurations (Ford Cleveland kits DO NOT include a water pump). S-Drive kits are available in seven custom finishes.

Cleveland Ford 351C ⚠

Complete System with A/C, 170 amp Alternator, and Power Steering *

See page 6-7 for more details.

- MS107-66 with attached plastic P/S reservoir
- MS107-66B with attached billet aluminum P/S reservoir
- MS107-66R with P/S pump for remote reservoir

MS117-54 Water Pump Pulley for Mechanical Fan

*Specify finish (machined, polished, color) and steering type (Ford steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

Billet Aluminum Thermostat Housings

Available for Small Block, Big Block and LS Chevs. Made in the USA from 6061-T6 billet aluminum, these housings feature a 360 degree swivel design that allows for correct hose alignment. The housings have an 80 degree outlet position and accept 1-1/2" radiator hoses. Small and big block Chevy housings utilize an O-ring seal eliminating the need for a gasket or sealer. LS Chevy housings replace stock pieces that have mounting holes with a 3" center-to-center dimension ONLY. These also utilize the stock factory seal with a 2 1/2" OD (sold separately). Available in black or clear anodized, raw machined, and bright polished finishes. Specify when ordering.

Thermostat Housing for Small & Big Block Chevy ⚠️

- MS106-85M Machined
- MS106-85P Polished
- MS106-85CA Clear Anodized
- MS106-85BA Gloss Black Anodized

Thermostat Housing for LS Chevy * ⚠️

- MS106-90M Machined
- MS106-90P Polished
- MS106-90CA Clear Anodized
- MS106-90BA Gloss Black Anodized

*ONLY replaces housing with 3" center-to-center mounting holes.

- Thermostat and Seal ⚠️
- MS106-75S Seal Ring for LS Chevy
 - MS106-75T 187° Thermostat and seal ring for LS Chevy

LT1 Gen V Chevy Accessory Kits

LT1 Gen V Chevy Power Steering Kit ⚠️

Add power steering to your new LT1. The kit works in conjunction with the stock LT1 Front Engine Accessory Drive and comes complete with a GM Type II power steering pump, all necessary billet aluminum brackets and pulleys, stainless steel fasteners, and a belt. The kit requires the use of an ATI Racing #917314 (or equivalent) six rib damper (sold separately).

- MS107-19 with attached plastic P/S reservoir
- MS107-19B with attached billet aluminum P/S reservoir
- MS107-19R with P/S pump for remote reservoir
- MS100-18 ATI Racing Damper

*Specify finish (machined, polished, color) and steering type (GM steering box, traditional, Mustang II, or center take-off rack&pinion) when ordering

LT1 Gen V Chevy Air Conditioning Kit ⚠️

The kit works in conjunction with the stock LT1 Front Engine Accessory Drive and gives you everything you need to install a compact Sanden SD7 air conditioning compressor for use with aftermarket air conditioning applications. The complete kit comes with a new compressor, all necessary billet aluminum brackets, compressor manifold, pulley cover, and stainless steel fasteners.

- MS107-98M Machined MS107-98P Polished
- MS107-98XX Specify Color

LT1 Gen V Chevy AC Delete Kit ⚠️

The kit works in conjunction with the stock LT1 Front Engine Accessory Drive for applications where air conditioning is not used.

- MS107-23M Machined MS107-23P Polished
- MS107-23XX Specify Color

LS Chevy Damper ⚠️

This SFI Approved balancer has a 6.325" diameter and requires the use of an aftermarket crank pulley like those found in Eddie Motorsports S-Drive Serpentine Belt Pulley kits (The balancer DOES NOT have integral serpentine belt grooves). This is a two piece unit with a CNC-machined aluminum outer shell and a steel hub. Also requires a new crank bolt for installation. Will not work on engines equipped with Variable Valve Timing (VVT).

- MS100-27 Damper
- MS100-11F LS Damper Bolt
- MS100-11S LS Harmonic Balancer w/Steel Hub

Billet Remote Power Steering Reservoir ⚠

When power steering reservoir clearance is an issue, our Billet Remote Reservoirs can be easily mounted up and out of the way. Remote tanks also have more capacity than attached reservoirs keeping the power steering fluid cooler. With an 18 oz capacity, the tanks are 9 1/2" tall, 2 3/4" round, and include an adjustable billet mounting bracket for easy installation. The reservoirs include a -6 AN pressure fitting and -10 AN return fitting. Available in raw machined and bright polished finish as well as a variety of Fusioncoat and anodized finishes.

MS107-80 Remote Reservoir

Billet Bolt-on Power Steering Reservoir ⚠

Machined from 6061-T6 aluminum, one of these Billet Power Steering tanks will add the finishing touch to any customized engine compartment. Offered as an option on many of our S-Drive pulley systems, the tanks are a replacement for the plastic reservoirs on GM type II pumps. The reservoirs are bolt-on for easy and positive installation and do not rely on the frustrating stock steel clips for fastening. Our billet aluminum reservoirs won't crack or leak like plastic tanks can! The reservoirs utilize a -8 AN return fitting. Specify finish when ordering.

NOTE: Billet tanks are NOT recommended for use in high usage or performance driving applications or for use with Hydroboost brake systems.

MS107-81M Bolt on Machined
MS107-81P Bolt on Polished
MS107-81XX Bolt on Color

Billet Radiator Overflow Tanks ⚠

Machined from 6061-T6 aluminum, Billet Aluminum Radiator Overflow Tanks are built to match our remote Power Steering tanks. With an 18 oz capacity, the tank is 9 1/2" tall, 2 3/4" round and feature a press-in, double o-ring cap and an internal return tube. The billet tanks have 5/16 hose fittings on the inlet and outlet and include an adjustable billet mounting bracket for easy installation. Available in raw machined or bright polished finish as well as a variety of Fusioncoat and anodized finishes.

MS107-88XX Radiator Overflow Tank

Power Steering Hardline ⚠

This custom line works on GM type II pumps with 16mm x 1.5 threads to adapt to a -6 AN pressure line. Standard equipment in our S-Drive kits with attached power steering tanks, the stainless steel line wraps around the back of the power steering pump to route your line cleanly out of the way. The kit comes complete with 16mm to -6 AN adapter fitting.

MS100-03L Power Steering Hardline

*Specify color when ordering: **P**=Bright Polished **M**=Raw Machined **BA**=Gloss Black Anodized

BK=Gloss Black **CA**=Clear Anodized **CL**=Protective Clear Coat **MB**=Matte Black **B**=Blue **R**=Red **W**=White **CH**=Chrome **CK**=Cerakote

Power Steering Line Kits ⚠

Kits provide stainless braided/Teflon lines and steel fittings to connect your power steering to our S-Drive or V Drive Pulley kits.

Universal Billet Aluminum Adjusting Rods ⚠

Add adjustability to your accessory mounting brackets. The rods come with steel 3/8" right and left hand rod ends. The rod adjusts out 1-1/2" from the specified dimension, measured from the center of the rod end mounting holes. Available in a bright polished or raw machined finish as well as a variety of Fusioncoat or anodized finishes. Sold individually.

Engine Components

GM Type II Power Steering Pumps ⚠

These cast aluminum pumps are the perfect upgrade when replacing your power steering system. Models are available with a plastic or billet aluminum attached reservoir or configured for use with a remote mounted reservoir. The pumps have a 17MM main shaft, three 8MM-1.25 mounting holes, and are available with a natural cast, bright polished, or black finish. Pumps are also available without threaded mounting holes for replacement of Eddie Motorsports (and other brand) pulley systems. All pumps come with pressure valves for both power steering gearboxes (high flow) and rack & pinion (low flow).

Pump for use with a remote reservoir ⚠

(sold separately) Pump has -6 AN Pressure fitting, -10AN return fitting, and 8MM-1.25 threaded mounting bosses. Specify pump finish.

MS100-70XX Power Steering Pump

Eddie Motorsports replacement with 5/16 mounting holes

MS100-71XX Power Steering Pump

Pump with plastic attached reservoir ⚠

Pump has -16MM x 1.5 female pressure fitting and -3/8" barbed return fitting with 8MM-1.25 threaded mounting holes. Specify pump finish.

MS100-72XX Power Steering Pump

Eddie Motorsports replacement with 5/16 mounting holes

MS100-73XX Power Steering Pump

Pump with billet aluminum attached reservoir ⚠

Pump has -16MM x 1.5 female pressure fitting and -8AN return fitting with 8MM-1.25 threaded mounting holes. Specify reservoir finish.

Aluminum Water Pumps ⚠

There's no easier way to drop a few pounds off of the front of your engine than by installing an aluminum water pump. Aluminum can also give your engine a more custom look. Eddie Motorsports now carries high quality aluminum short water pumps for Small Block, Big Block, and LS Chevys. Available in natural cast, black, and bright polished finishes with standard rotation (for V-belt systems) and reverse rotation (for serpentine belt systems) configurations. Specify finish when ordering.

Heat Shrink Hose Clamps ⚠️

Don't trust your engine to just any hose clamps. Try these all new, heat-sensitive, thermoplastic clamps that seal better in all conditions and temperature extremes. All you need to install them is an ordinary heat gun. Yes, that's it! Measure accurately to determine the correct size clamp and apply heat until the clamp shrinks and makes a secure, hard plastic seal. Not only do the clamps bond better than a traditional screw type clamp, they are thinner and far more visibly pleasing in your hot rod's dressed-up engine bay. Clamps are sold individually.

Eddie Motorsports Billet Aluminum Hood Hinges

Eddie Motorsports' billet aluminum hood hinges are CNC machined to perfection in the USA from high quality 6061-T6 billet aluminum. Our hinges provide a stunning alternative to your car's unsightly stock stamped steel hinges and springs. Enhanced by nitrogen filled gas struts and sealed bearings, Eddie Motorsports' hinges give your hood outstanding stability and flawless operation that is simply not possible with 40-50 year old stock hinges. Eddie Motorsports is the world's largest manufacturer of billet aluminum hood hinges. We have the biggest selection of hinges for muscle cars and trucks in the industry and the widest range of custom finish options.

Hood Hinge Finishes

For the ultimate show quality part, Eddie Motorsports offers hinges with seven different *standard finishes and four additional **special finishes. Hinge kits come complete with bright polished stainless steel struts and fasteners. All black finishes come with black struts and stainless steel fasteners.

Kinetic Hood Hinges

Kinetic hood hinges are available for most existing Eddie Motorsports car and truck fits. Bring your ride to the next level. Using the same T-6061 as the aerospace industry, these hinges are strong enough for anything from your daily ride to your weekend cruiser. The precision cut accent windows are sure to bring any engine compartment up a notch. Each pivot point gets a smooth sealed bearing and nitrogen charged strut to aid in popping that hood at your next meet or Show n Shine. Increased adjustability means body lines you can be proud of.

Stainless Steel Gas Struts

The stainless steel nitrogen filled gas struts that we use on our hinges are of the highest quality for years of uncompromised performance. They are available in various strengths to accommodate a wide variety of hood weights. All of our hinges are supplied with a strut that we have predetermined, through our R&D process, to be the correct pressure rating. In cases where your application is different or unusual, notify us and we will be happy to supply you with the appropriate strut for your use. See page 45 for a complete listing of our struts.

Nitrogen Gas Struts

Since we first introduced our billet aluminum hood hinges in 2009, Eddie Motorsports has always used high quality, stainless steel nitrogen gas struts. We have since become the largest provider of these struts to the hot rod industry, selling thousands of units, not only for our own hinges, but for our competitor's hinges and their customers who have required an upgrade. Our large selection of available pressure ratings have made our struts desirable for achieving optimum performance from billet aluminum hood and trunk hinges.

Stainless Steel Gas Struts ⚠

Weight listed specifies the amount of force needed to begin the actuation of the strut. From the center-to-center of the mounting points, the struts measure 7 1/4" in the fully open position and 5 1/4" in the fully closed position. They are available in standard, heavy duty and for use with 10MM or 14MM ball stud mounts (sold separately). Struts are available in a stainless steel polish or a black finish and are sold individually.

Standard Stainless Steel Struts for use with 10MM ball stud mounts.

Sold individually:

MS149-60-080	Gas Strut 80 lbs	-Polished
MS149-60-080B	Gas Strut 80 lbs	-Black

MS149-64	Replacement Pin Clip Struts using 14MM Ball Mount

Billet Trunk Hinges

The trunk is probably the last thing most people think of when customizing their classic cars. But, Eddie Motorsports leaves no stone unturned when it comes to upgrading your ride. Our high quality aluminum hinges are CNC machined to perfection from a solid piece of aluminum and can vastly improve the look of your trunk compartment. Unless otherwise noted, our trunk hinges utilize nitrogen filled gas shocks and high quality Delrin bushings for a smooth reliable operation that is far superior to that of the stock hinges and their less-than-precise torsional springs. Designed as direct fit, "bolt on" parts, the hinges use the stock mounting holes (some minor drilling for the shock mount may be required). Sold in pairs.

Billet Aluminum Battery Boxes for 1955-1956 Chevy Sedan ⚠️

For that final touch of class in your engine compartment, add one of our billet aluminum battery boxes for 1955-1956 Chevs. Machined from 6061-T6 billet aluminum, these kits come with stainless steel mounting fasteners and are a direct bolt on replacement for your stock stamped steel tray. They clear our billet hood hinges with no modifications necessary. Models are available for Optima D34 and R34 and Group 78 side post batteries. Our billet battery boxes are available in raw machined, bright polish finishes as well as a variety of Fusioncoated colors and anodized colors.

Billet Hood Brace

Our billet CNC machined hood braces, supports, and latch assemblies for 1955-1957 Chevy Sedans are a must for today's Restomod builds. At Eddie Motorsports we are constantly developing custom products and offering them at an affordable price. Our billet under-hood pieces certainly hit this mark. When you combine these parts with a set of our billet hood hinges, you car's engine compartment appeal will be stunning. Installation for these direct replacement parts will require drilling out the rivets that hold the stock stamped-steel braces. They will be replaced by the new stainless steel fasteners. Will not clear stock radiator hose on six cylinder applications.

1967 Camaro RS Billet Grille & Headlight Covers

Yes, we machined a billet grille for the 1967 Camaro RS at an affordable price. Our three-piece grille assembly consists of two grille pieces and a center cover plate. The cover plate is available with an RS logo, SS logo or with a plain finish (specify when ordering). Billet headlight covers (sold separately) are also available and are the perfect complement. The headlight covers are sold in pairs and can also be used in conjunction with your stock plastic grille. Available in various finishes. Factory steel trim not included.

Billet Three Piece Grille

Extinguishers and Brackets

The unique construction and function of Eddie Motorsports fire extinguisher brackets is unsurpassed by others. Over the past 10 years, these brackets have withstood thousands of miles of abuse in high performance boats and have endured flawlessly. The brackets are CNC machined out of 6061-T6 aluminum and are built to allow for mounting in any position. The round mounting cylinder fastens permanently to the extinguisher (sold separately) and is held into its base with a stainless steel aircraft quick release pin. A swift pull of the pin is all it takes for you and your very cool new fire extinguisher to be ready to save the day. The large brackets work with our 2.5lb. (3" O.D.) extinguishers. The small brackets work with our 1lb. (2 3/4" O.D.) models. The brackets are available in a machined or highly polished finish or in any of our many custom Fusioncoat colors.

Hood Latches

Eddie Motorsports leaves no stone unturned when it comes to dressing up your car's engine compartment. Our latest piece of custom hardware is our billet Hood Latch assemblies for Chevy muscle cars and trucks. Machined from solid chunks of 6061-T6 aluminum and 304 stainless steel, the latch assembly is a direct replacement for your cheap stock stamped steel pieces. The hood latch kit comes complete with a billet aluminum base plate, pilot bolt and retaining cup and pop-up spring (some applications). Stainless steel fasteners and billet aluminum finishing washers are also included. Available with a raw machined or highly polished finish as well as in a variety of Fusioncoated colors.

Billet Aluminum Hood Pins

There's nothing more frightening or potentially more damaging than a hood that's blown loose on your classic car at high speeds. Eddie Motorsports new billet aluminum hood pins will insure that this never happens to your car. The complete assemblies are CNC machined from billet 6061-T6 aluminum and, like all products produced by Eddie Motorsports, they are American made to the strictest manufacturing standards. They are fastened to the hood with four blind #8 studs and come with a billet adjuster nut and flip over pin with integral tether. Our hood pins are available in a raw machined or bright polished finish as well as black or clear anodize. Sold in pairs.

Billet Aluminum One-Piece Taillight Kits
1967-1972 Chevy C-10 Truck ⚠️

Eddie Motorsports has designed a custom billet aluminum tail light assembly for Chevy C-10 1967-1972 trucks. These kits include precision CNC machined 6061-T6 aluminum bezels, LED tail lights, and a heavy duty LED flasher. (Does not include backup light). The kits are available in a customizable sequential operation. The sequential feature is controlled by an integrated selector switch. You have the option of having the taillights sequentially flash from inside out, outside in or simultaneously. The sequential lights also include a Brake Attention mode which, when engaged, rapidly flashes the stop light for an instance to gain the attention of motorists following your vehicle. The tail light kits are sold as a pair. Bezels are available in seven custom finishes.

Billet Aluminum Sill Plates 1967-1972 Chevy C-10 Truck

Our 1967-72 Chevy C10/C20 truck billet aluminum door sill plates are both high strength quality and easy to install. We didn't take any short cuts in manufacturing our billet aluminum sill plates. They are completely machined out of a solid piece of 6061-T6 aluminum to provide a secure and long-lasting part. We didn't quickly machine or bend a thin sheet to produce our plates. With our precision machining, you get a part that perfectly fits every time. These sill plates are designed as a direct bolt-on to update the standard stamped factory plates. Sold in pairs.

Billet Aluminum Door Handles

At Eddie Motorsports, we specialize in building high quality billet parts that "shine" and accent every last piece on your ride. But, we also focus on giving hot rodders the added value of products that surpass the quality and durability of the stock or cheap imported replacement components that are prevalent in the market. Such is the case with our new billet aluminum Door Handles. Machined from solid chunks of 6061-T6 aluminum, these one piece handles are a direct replacement for the stock pot metal parts. Available in five styles; original smooth, ball milled, lightning, diamond hatch cut or accent. The handles are now available chrome plated or can be purchased with a brushed satin or bright polished finish as well as a variety of Fusioncoat and anodized colors (specify when ordering) and our highlight finish- black anodized with machined highlights. The handles are sold in pairs, **include gaskets, and all necessary stainless steel fasteners.

Interior Door Handles

Eddie Motorsport's new line of Billet Aluminum Door Handles and Window Cranks are both beautiful and functional. With a thicker configuration, our handles have a more solid feel than the "petite" street rod style handles that are currently available. All of the handles feature a base that is 2" to cover the upholstery cutouts from most existing OEM handles. The Eddie Motorsports Billet Aluminum Door Handles & Window Cranks feature a heavy duty aluminum 16 spline insert that is compatible with GM and Ford applications and prevents wearing out and stripping, a common occurrence with original and imported pot petal handles. The billet handles are available in four distinct styles and in a variety of custom finishes including chrome plating. Specify finish when ordering. Handles are sold in pairs.

13 1/2" & 15" Billet Steering Wheels One of the first things when buying a steering wheel is choosing the size (diameter) you need. Here we have our 13 1/2" and 15" steering wheels side by side showing the visual difference between the two available sizes. The 13-1/2" (340 mm) as well as the 15" (380 mm) steering wheels have a 9 x 3.75" mounting bolt pattern. Wheels are available in a synthetic leather half-wrap, a sport synthetic leather half-wrap or a full-wrap grip in your choice of an Automotive grade Leather or a Alcantara Suede.

15" Wheel

13 1/2" Wheel

13 1/2" & 15" Steering Wheel Grip Options

Standard Series (Half-Wrap)

Our standard series style wheel grips are a half-wrap design. Half billet aluminum, half synthetic leather grip. Available in six different grip colors.

Sport Series (Half-Wrap)

Our sport series style wheel grips are a half-wrap design with 3 different billet aluminum accents. Available in six different grip colors.

GM Steering Wheel Adapters

These billet aluminum adapters are available for specific GM, Ford, and Mopar splined steering columns and industry standard nine-bolt steering wheels. Eddie Motorsports billet adapters are offered individually (without screws) or in a kit with horn cap and screws. With a functional horn kit, the adapters are 2-1/2 tall. Our horn covers are available in two distinct styles, our standard cover and our full horn cover (hides the steering wheel mounting fasteners). GM, Ford and Mopar adapters with or without horn covers are available. Horn covers are also available separately. Specify finish when ordering. NOTE: Will not fit applications with telescoping steering column.

Billet Aluminum Fuel Vent ⚠️

Eddie Motorsport's billet aluminum fuel vent is a perfect solution for adapting a late model, non-vented gas cap to your muscle car as required in fuel injected applications (installation requires the gas tank to have a vent outlet). Running a non-vented gas cap also prevents fuel from spilling out of your original cap under hard acceleration. The vent, which can work as a differential breather as well, may reduce or eliminate gas odors that are often the norm with traditionally vented gas caps on muscle cars. Precision CNC machined from 6061-T6 billet aluminum, the vent is 2 1/2" wide and 4" tall. The vent is installed above the car's gas tank, usually in the trunk, and allows your gas tank's vapors to travel up into the vent and dissipate through the 30 micron filter element included in the vent kit. The vent can be mounted through the base or against a surface. Connection to the vent is done through the two 3/8" NPT threaded ports on the bottom. The vent kit includes the billet aluminum vent, two 3/8" NPT bulkhead fittings, 90 degree surface mount bracket and a filter. Connecting hose and fittings are not included. The vent is available in a bright polished or raw machined finish or in a variety of Fusioncoat or anodized colors. Specify finish when ordering.

Billet Aluminum High Volume Fuel Filter ⚠️

These high volume fuel filter heads are precision CNC machined from 6061-T6 aluminum. The heads accept water separating fuel filters with 1"-14 threads and can be purchased with or without a WIX filter. Equipped with four 1/2" NPT inlets/outlets for added plumbing flexibility, the filter heads incorporate two 5/16" mounting holes. The filters offer 14 micron filtration and are rated at 100 GPH making them ideal for high performance use. They are 7" tall and have a drain plug at the bottom. The filter heads are available with a bright polished finish or in a variety of anodized and Fusioncoat finishes.

LS Chevy Coil Relocation Mounts

For the enthusiast who's willing to go the extra distance, these mounts give you an easy installation alternative for cleaning up the look of your engine by relocating your LS coils, Eddie Motorsports manufactures kits to accommodate LS-2,3,7 and 9 coils, LS-1 coils, and Mercury Marine/FAST/AEM /Holley IGN-1A coils. The brackets are sold in a kit with four mounts to accommodate all 8 coils. For a simpler mounting solution, we also offer the coil mounts in kits with auxiliary mounting brackets that allow you to easily group and mount the coils in several configurations. Precision CNC machined from billet aluminum, the coil mounts and brackets are available in a bright polished or raw machined finish as well as a variety of Fusioncoat and anodized colors. Specify finish when ordering. Made in the USA.

LED Lights

OEMs realized the advantages of Light Emitting Diode (LED) technology years ago and it is now available for your classic car in the form of LED lights. These lights are direct replacement units and offer simple plug-in installation with no drilling, cutting or splicing of wires. The LEDs are waterproof and virtually unaffected by shock and vibration. They are rated for 100,000 hours of operation and come with a limited lifetime warranty. All of the lights are sold individually and require the use of an LED flasher (sold separately).

Eddie Motorsports is a leading automotive company specializing in the design, manufacturing, and distribution of high-quality aftermarket automotive components and accessories. Established in 2009, the company has grown to become a trusted name in the automotive industry, known for its innovative products and exceptional customer service.

With a passion for cars and a dedication to craftsmanship, Eddie Motorsports is committed to delivering top-notch performance and style upgrades for a wide range of vehicles. The company offers a diverse product lineup that includes precision-engineered billet aluminum parts, engine dress-up kits, steering components, seating options, interior components, and more.

Driven by a team of experienced engineers, designers, and enthusiasts, Eddie Motorsports combines cutting-edge technology with meticulous attention to detail to create products that not only enhance the performance of vehicles but also elevate their aesthetic appeal. Each component is carefully crafted to meet the highest standards of quality and durability, ensuring that customers receive products that are built to last.

In addition to its commitment to superior craftsmanship, Eddie Motorsports places a strong emphasis on customer satisfaction. The company strives to provide an exceptional buying experience, offering personalized support and technical assistance to help customers find the perfect solutions for their automotive needs. Whether it's a classic car restoration project or a modern vehicle upgrade, Eddie Motorsports is dedicated to helping enthusiasts bring their automotive visions to life.

Furthermore, Eddie Motorsports actively engages with the automotive community through participation in industry events, collaborations with other leading brands, and sponsorship of car shows and races. By staying connected to the enthusiast community, the company continuously seeks inspiration and feedback to further improve its products and develop innovative solutions.

With a reputation for excellence, Eddie Motorsports has earned the trust and loyalty of customers around the world. From passionate car enthusiasts to professional builders and racers, the company's products have been installed in countless vehicles, making a lasting impact on the automotive landscape.

Overall, Eddie Motorsports is driven by its mission to provide exceptional automotive components and accessories that blend performance, style, and reliability. Through its unwavering commitment to quality, innovation, and customer satisfaction, the company continues to lead the way in the aftermarket automotive industry, helping car enthusiasts take their vehicles to the next level.
